

# NO MORE PANIC DELIVERIES!

Watchman takes care of your bulk supply

## The ideal wireless tank gauge

The Watchman is a revolutionary electronic gauge that allows you to monitor the level of liquid in your storage tank – all from the comfort of your home or office!

**Operates on any tank**

**Easily installed - no wiring**

**Plugs into any 13amp socket**

**Up to 1000 metres range**

**Shows tank level in tenths, updated hourly**

**Flashes red warning light when level is low**

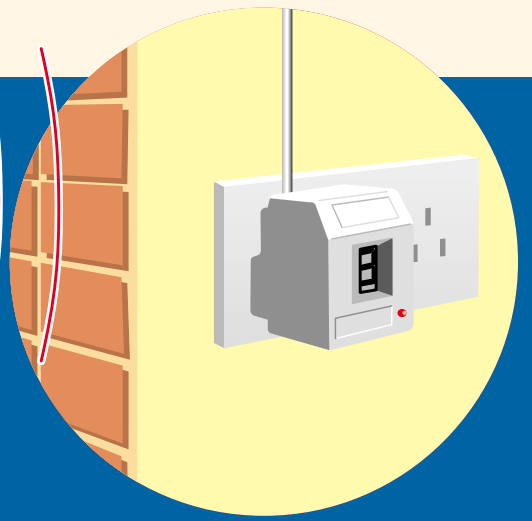

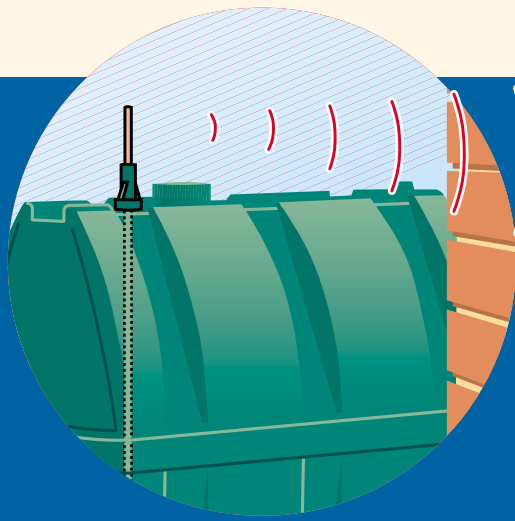

**Works with the FullStop to prevent overfills**

**Up to 5 year battery life**

**Fully tested technology**

**No moving parts**

**Watchman**

## The Watchman regularly checks your supply

**1** A probe is fitted inside your storage tank. Using new technology it senses the level of liquid and its small transmitter sends this information out by regular radio signals up to 1,000 metres, right into your premises.

**2** Once your Watchman is plugged into an electrical socket you can read the level of liquid in your tank from its clear display. No need to go out into the cold to check your level.

**3** Your Watchman measures the level of liquid in your tank in tenths. When the level is low its red light pulses to attract your attention.

**Environmental protection** Your Tank Signal System will allow deliveries to be made using the FullStop overfill alarm. This improves environmental protection by helping to prevent overfills.

Sensor Systems are proud to support these trade organisations and to have received these awards and approvals:

**ALGED**  
Association of Liquid Gas &  
Equipment Distributors UK
